INNOVATIONS IN **NAFLD CARE** BARCELONA

WORKSHOP, 26 - 27 May 2023, Barcelona, Spain

Welcome

The **Innovations in NAFLD Care (INCBCN) Workshop 2023** is taking place from 26 to 27 May as a hybrid workshop in Barcelona, Spain.

Non-alcoholic fatty liver disease (NAFLD) is estimated to affect 33% of the world's population. Given the association between NAFLD and the growing global epidemics of obesity and type 2 diabetes, this number is expected to increase.

Despite this high prevalence, there remain challenges in screening, as only a minority of cases are diagnosed and correctly treated. There is a growing need to design and implement comprehensive models of care.

The cascade of care for the diagnosis and treatment of NAFLD requires a multidisciplinary approach, with the development of patient-centric structures and systems that facilitate the coordination and integration of services delivered at different levels of healthcare systems.

Target Audience

Hepatologists, Diabetologists, Endocrinologists, Obesity experts, Internal medicine specialists, Gastroenterologists, Primary care physicians, Dieticians, Nurses, Physiotherapists, Policymakers, Public health officials, and Patient advocates.

Meeting Objectives

- Gather patients and leading experts from different disciplines involved in NAFLD care;
- Share the knowledge that exists in different fields and healthcare facilities; and
- Raise awareness and support the implementation of multidisciplinary management of NAFLD.

Corporate Support

To organize this much-needed interactive platform, we rely on funding. Supporting this workshop will provides the opportunity to profile your organization within the community and to show your commitment to advancing the field.

100% scored (very) good on overall event experience

98% (strongly) agreed the lectures given in this workshop have increased their knowledge of NAFLD care

98% (strongly) agreed this program is beneficial for the clinical management of their patients
