

## Welcome

The 10th edition of the **International Workshop on HBV Cure** will take place as a hybrid workshop on 8 November 2023 in Boston, United States (see [HBV Cure 2023](#) for this year's edition).

Since 2014, the International Workshop on HBV Cure has been a scientific platform acting as a catalyst to accelerate the progress for achieving a cure. Around the globe, more than 250 million people live with hepatitis B (HBV).

The purpose of the workshop is to inform the participants about the developments in the work to find a cure for HBV.

The workshop will be highly interactive with input from experts out of the arena of basic, translational, and clinical HBV research.

### Target Audience

- Clinicians;
- Researchers;
- Academia;
- Industry; and
- Government representatives

### Corporate Support

To organize this much-needed interactive platform, we rely on funding. Supporting this workshop provides you the opportunity to profile your organization within the respective community and show your commitment to advancing this field.

## Program Directors

**Harry Janssen,  
MD, PhD**

Toronto Centre for Liver  
Disease / Erasmus Medical,  
Canada / Netherlands

**Adam Gehring,  
PhD**

Toronto Centre for Liver  
Disease,  
Canada

### Meeting Objectives

- Discuss how to reach an HBV functional cure with newly developed agents targeting the immune system or the viral replication cycle;
- Develop endpoints and better biomarkers for these studies; and
- Discuss how new agents should be combined to reach the goal of a functional cure.

## 2022 Facts and Figures

**144** Attendees  
**78%** Specialized in Hepatology

**100%** (strongly) agreed the lectures given in this program have increased their knowledge of HBV Cure.

**97%** (Strongly) agree that the content is relevant to their practice

**27** Countries

**95%** (Strongly) agree that the content was free from commercial bias

**15** Lectures
